

The scatter plot displays the annual number of deaths from 1996 to 2016. The x-axis is labeled with years from 1996 to 2016 in increments of 4 years. The y-axis represents the number of deaths, with major grid lines at 0, 10, 20, 30, 40, 50, 60, 70, 80, 90, and 100. The data points are blue circles. Most years have a death count between 0 and 10. Notable outliers include a single point at approximately 85 deaths in 2001 and another at approximately 35 deaths in 2004. A period of higher mortality is visible between 2010 and 2013, with peaks around 2011 (approx. 25 deaths) and 2012 (approx. 30 deaths).
